

### 14.4 / 18 VOLT CORDLESS LITHIUM-ION SERIES

The new HXP Li-ion Drills are designed to address and exceed the needs of professionals. Engineered with a class leading power of up to 570 in/lbs in torque with a two-piece rare-earth magnet motor to guarantee reliable power and performance for the toughest jobs.

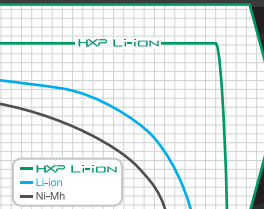

#### Battery Save Mode

Hitachi's exclusive Save Mode feature conserves and extends battery run time with a simple flip of a switch.

#### Fade Free Power

Hitachi's HXP Li-ion batteries produces consistent power with no RPM slowdown unlike traditional Ni-Mh/Ni-Cd and other competitive Li-ion batteries.

#### Non-Slip, Soft Grip

Ergonomically designed Elastomer soft grip handle has a comfortable and dimpled surface that reduces slippage, increases control and comfort.

#### Interchangeable HXP Battery Platform

HXP Li-ion batteries are exclusively designed to fit Hitachi's award winning line of DMR 14.4 / 18 volt Cordless power tools. While allowing users to upgrade their existing Hitachi 14.4 / 18 volt cordless with HXP Li-ion battery technology.

#### Heavy Duty Chuck

Equipped with an industrial grade, all-steel 1/2" ratcheting chuck. A smooth steel stabilizer ring ensures precise drilling and driving, while a ratcheting lock keeps bits secure in the carbide jaws of the chuck.

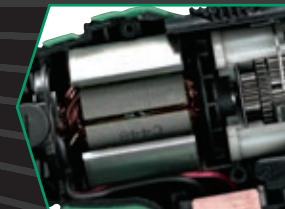

#### Unique Belt Hook

Exclusive to Hitachi, these drills come standard with a pivoting, 5 position belt hook that features an integrated amber LED work lite to illuminate low light work areas.

#### High Power Motor

The powerful motor is the heart of Hitachi's HXP Li-ion drills. Built with rare-earth magnets and heavy gauge copper coils, these 2-piece, industrial grade motors can withstand the high heat and stress of extreme use.

#### HXP Li-ion Technology

High power HXP Li-ion battery technology features extended run time, fade free power, 40% less weight and 3 times the power capacity of standard Ni-Cd/Ni-Mh batteries.

#### Cross Compatible Charger

Charging a range of Hitachi's 7.2V - 18V Ni-Cd, Ni-Mh, and Li-ion batteries. Featuring a built in Cool Air Flow system to maintain the optimal charging temperature.
